

Parker Street

Client:
Colliers International

Location:
Liverpool

Value:
£1.5k

Commenced:
Aug 2013

Duration:
2 days

We were commissioned by Property Consultancy firm, Colliers International, to carry out management surveys of two retail units in the Parker Street Shopping area in Liverpool.

The surveys were required to prepare the property for sale.

We attended a pre-start meeting with the Project Managers and

shop staff to agree a programme of work that would allow us to access and inspect the properties while they were occupied and fully operational.

Our lead surveyor surveyed the two units which included inspections of the ceiling voids, risers, structural cladding, boiler rooms and external areas (i.e. rainwater goods etc).

Global Environmental were able to plan and deliver this tricky asbestos surveying project with the minimum of fuss. Their ability to anticipate issues and liaise with occupants and other stakeholders is particularly impressive.

Simon Long, Associate Director, Colliers International
